DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 6, filed August 9, 2006, with respect to claims 1, 3, 4, 9, 10-12, 14, and 20 have been fully considered and are persuasive. The objection to claims 1-3, 6, 9-14, and 19-20 and the rejection of claims 1-6 and 8-21 has been withdrawn in view of the changes to the claims made by most recent amendment.
2. Applicants' remarks correctly point out that the Yamaguchi reference EP 1174903 does not teach a two-mode ionization having a moveable desolvation chamber. The previously set forth rejection under 35 USC 102(b) in view of Yamaguchi (EP 1174903) is withdrawn.

Allowable Subject Matter

3. Claims 1-5, 7-14, 16-18, and 20-22 are allowed.
4. The following is an examiner's statement of reasons for allowance:
5. After review of the prior art, the examiner further cites USPN 6,977,369 to Yamaguchi et al. Though this reference discloses a similar device, there is no apparent double patenting rejection applicable after comparison of the claims. Further, the reference does not appear to be applicable prior art as it is not by another, having the same inventive entity, and
6. As for the previously relied upon Yamaguchi reference (EP 1174903), the applicant has correctly pointed out that the prior art device at least lacks the movable desolvation chamber to effect dual mode ionization of a sample by "cold spray" technique, detailed at Col. 2 of the '369 patent, and electrospray ionization. Therefore, when taken with all the other limitations of claim 1, this feature distinguishes over the prior art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
